Aditya Jatav
Software Developer

SUMMARY

4 years experienced java backend development professional with a prolific track record of designing, testing, troubleshooting and monitoring software as well as upgrading the existing programs. Adept at planning & executing deployment of system features, orchestrating the integration, and maintaining the system throughout its lifecycle. Proficient in interacting with the key clients, understanding their requirements to complete projects within stipulated time & budget, and ensuring optimum client satisfaction.

TECHNICAL SKILLS

Skills: Data structure, algorithms, J2SE, Maven, Git, Mockito, JUnit, GraphQL, Microservices, REST.

Languages: Java 8, HTML, CSS, Angular 8.

Framework & Web Services: Spring Boot, Spring, Hibernate, JPA.

Database Management: SQL(Mysql), NoSQL(MongoDB).

Tools: Github, GitLAB, Eclipse & IntelliJ IDE, JIRA, Confluence, Postman, Jenkins, Git Actions, SonarQube, NexusScan.

KEY SKILLS

- **Software/Application Development & Maintenance • Unit Testing • Code Optimization • Documentation • Troubleshooting**
- **Code Testing • Team Management • Software Analysis • Application Update • Client Servicing • Project Management**
- **Quality Assurance • Application Development • End-user Support**

PROFESSIONAL EXPERIENCE

Programmer Analyst

Jan '22 - Aug '23

Cognizant

Pune, India

Coding & Code Modules Testing

- Implement a feature that helps the client to book flights based on departure date and time and updated the request body.
- Developing **plans and models**, often as flowcharts, to assist programmers with the coding to create software.
- Conducting the testing of completed code modules and fixing code to **ensure smooth functionality**.
- Writing code for stand-alone applications & those that access servers to create **optimum systems** for the business.

Software Upgrade & Maintenance

- Model and version upgrades to the **existing programs** or systems as required and recommending software solutions.
- Executing deployment in openshift using jenkins and git actions of system features, monitoring **successful integration** & maintaining the system throughout its lifecycle.

Team Management & Application Development

- Drafting **documents** on the working/upgrade of applications or systems to ensure they're maintained properly in the future
- Collaborating with the **cross-functional teams** to develop & update software.
- Supporting as well as creating back end applications that utilize **large amounts of data**.

Client Interaction & Software Designing

- Coordinating with the developers to design, test, and develop software to fulfill the projects with **100% accuracy**.

Project Engineer

May '19 - Jan '22

Wipro

BLR, India

Automation

- Automated the ServiceNow(access related functionality) and monitoring using selenium that saves thousands of dollar of client.

Java Application Development & Technical Designing

- Designed, implemented, and maintained Java spring boot application.
- Implemented the **product's lifecycle** including designing, development, quality, deployment, and maintenance.

Application Coding & Process Improvement

- Created application code for java programs and developed, tested, implemented, and **maintained application software**.
- Collaborated effectively across cross-functional teams to conduct **software analysis**, programming, testing, and **debugging**.

INTERNSHIP

Wipro

Jan '19 - Mar '19

Automation of financial reports

- Automated the weekly Excel reports using Apache POI Library.
- Helps manager to make ppt's to showcase the work done to client.

CERTIFICATIONS

- IBM Certified Application Developer - Watson V3 Certification
Credential ID IBM000234917
- Certified SAlFe® 5 Practitioner, Expires on October 14, 2023

INTERNAL PROJECTS

TWEET Application (Spring boot, mongodb, angular, aws(RDS, S3,Elastic Beanstalk)).

ESTOCK Application (Spring boot, mysql, angular, aws(EC2)).

Pet Watering System using Arduino Board (Minor Project).

EDUCATION

Institute of Engineering and Technology, DAVV

Jul '15 - May '19

B.E. (Information Technology)

Indore, India
